

The new System 350 Plus heavy-duty mail processing system...

...is a rugged, dependable, high performer for heavy-volume mail and shipping.

System 350 Plus HASN shown interfaced with a 150-pound capacity postal scale featuring a digital data display and offering differential weighing.

Developed specifically for the Windows 95/98/NT operating systems, the *i MCM* Mail Center Manager system provides complete control over the weighing, rating, processing and accounting of all your outbound mail and parcels. Your mail center's complete "Plug and Play" solution.

Millennium Technology with Y2K Compliance

Postal Scales – Model AH30 and Model AH100 provide set time and date functions and the year 2000 is entered as "00". There will be an automatic transition from "99" to "00".

Mailing Machines — All Ascom mailing systems are Y2K compliant.

Remember — genuine Ascom supplies will help your Ascom mailing equipment operate at its full potential. Be sure to ask your dealer for a competitive cost comparison!

Seasonal postage meter messages help your mail attract greater attention. Custom designs are also available.

FORM 50601, (3/99) 5M

An ISO 9001 Quality System Certified company. Ascom is an internationally active telecommunications and service automation group with 12,000 employees worldwide.

ascom

ascom
America's Better Choice.

No matter what business you're in, you'll find Ascom's 300 Series will add new productivity and efficiency to your mailing operations

All Ascom systems –

- provide for meter security codes, plus up to nine programmable function keys for commonly used postage values
- contain a double-roller sealing mechanism to help protect your mail
- use economical, long-lasting and disposable ink cartridges, or optional inking system
- offer the best value and lowest operating costs in the industry

Ascom Model 350 Plus HASN interfaced with Model AH30 postal scale and an AMS 24 (MMS) data collection and management system. Displayed on a custom-built operating console.

Designed for heavy-volume mail and shipping processing, Ascom's 300 Series...

...offers modular engineering and construction which permits you to add a full range of compatible components with features to benefit your growing needs. For example, our mail feeders, postal scales, meters and postage tracking systems are all interchangeable!

The enhanced Plus Meter brings new efficiencies to mail operations with-

- a built-in modem and power supply to make TMS postage replenishment even faster and easier
- automatic date advancing
- a redesigned keypad for easier function selection.

Model 335 Plus HASN interfaced with the Windows 95/98/NT-compatible AMS 24 Mail Management System and automatic mail conveyor stacker. The Model AH30 postal scale offers differential weighing.

Precision, load-cell technology in the Model AH30 scale...

guarantees the optimum in savings for your office mailing operations. With both USPS and UPS rate information, this versatile, fully featured, electronic scale is perfect for all but the heaviest-capacity requirements.

- Load-cell technology provides accuracy to 1/32 of an ounce.
- The easy-to-read, alpha-numeric display prevents visual error, helping to save even more postage.
- With an envelope or parcel on the scale platform, the exact postage will display and automatically be set in the postage meter after the class of mail is keyed.

- Automatically converts the ZIP code to the proper zone to save time and eliminate the chance of error. USPS and UPS!
- The "best way" rate search feature permits the operator to compare related USPS, UPS, and all other carrier rates. The least expensive option is quickly identified.

MMS software takes advantage of all the benefits of Windows 95/98/NT. It will consolidate accounting information from up to 24 local AMS 24 terminals or hundreds of remote terminals via modem. The system then uses a powerful networked database to report on and share accounting information with anyone in your organization.

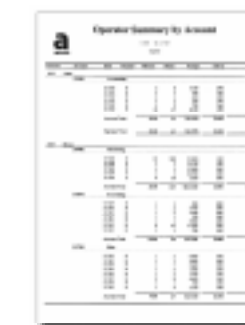

Postage refilling.

As standard, the Tele Meter Setting (TMS™) feature permits you to conveniently replenish postage in your 300 Series meter in just 30 seconds via a toll-free, direct computer link to your postage account. No dedicated phone lines, code numbers or locking mechanisms are needed.

Special functions offered by the enhanced Plus Meter

- FUNC TIONS** Used with a numeric key to initiate pre-programmed keystrokes.
- KEY** Used to enter a security code.
- POST TMS** Calls up Descending and Ascending Registers, Total Number of Items and Control Total. Also used to replenish postage via TMS.
- ACTG DATA** To view, print or clear departmental data.

MMS mail management reports, like this Operator Summary by Account, help you track the most complex mail, shipping and other communications functions.
