WJ250

The Perfect Mailing
System for High
Volume Mailing Needs

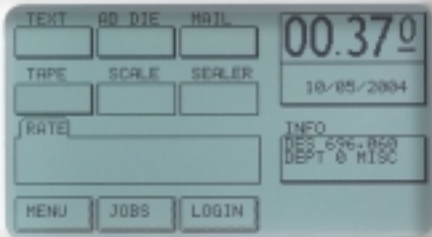

HASLER
America's better choice.®

PROCESS UP TO 250 LETTERS PER MINUTE WITH THE WJ250

Remarkably easy-to-operate and cost effective, the WJ250 mailing system can process your mail at speeds up to 250 letters per minute. With the WJ250, you can automatically feed mixed mail and process envelopes whether nested, non-nested or a combination of both. You can choose to seal every piece or not. And you can accurately track costs for multiple accounts -- starting at 200 standard accounts and expanding to meet your business needs. Accurate, fast, and flexible, the WJ250 is the perfect choice for high volume mail centers.

Mixed Mail feeder allows processing of mixed mail, whether nested envelopes, non-nested or a combination of both.

Easy to use large touch screen makes it simple to program repetitive jobs or modify print modes

Pump-based sealing provides a constant flow of water to ensure every piece is sealed.

ELIMINATE HAND SORTING AND PROCESS MAIL MORE EFFICIENTLY BY WEIGHING IN MOTION!

Make your mail processing even faster and more efficient by combining the WJ250 with Hasler's Dynamic Weighing Platform (WJDWP). The Dynamic Weighing Platform, with built-in size and thickness sensors, enhances the performance of the WJ250 by providing accurate and efficient processing of mixed weight mail up to 2 pounds – at speeds up to 130 letters per minute -- it even calculates the rate for oversized mail. When operating in Dynamic or Batch modes, there is no need to sort or weigh by hand. It's fast, accurate, and fully automatic, allowing you to reduce labor costs and increase productivity with the touch of a button.

And you'll also save time with the WJ250, thanks to a number of advanced features, including the option of differential weighing, which allows for easier and faster mail processing at

various sizes. Imagine quick and accurate weighing

and metering of everything from single business envelopes to large packages all at the same time. There's no time wasted with sorting various sized mail. Differential weighing does it all for you in one easy step. In fact, the WJ250 provides up to 300% faster processing time over conventional weighing methods, which means all of your mail is now handled quickly and with complete ease.

The WJ250 can interface easily with the full line of Hasler scales and weighing platforms, as well as the WJR30 Roll Tape Dispenser.

HASLER'S WJ250 MAKES IT EASIER TO:

Save money on ink refills. Our high capacity ink cartridges yield over 200% more impressions than our competitor's.

Save Time by programming up to ten of your most repetitive jobs easily on a large touch screen.

Customize mailings with User Text (five customizable), Advertising Dies and Mail Class Dies (five pre-loaded and four customizable of each).

Meet the cost control needs of businesses. Track 200 standard mail center accounts – expandable to grow with your business.

Weigh, rate and print postage at the touch of a button.

With the WJ250, the Mixed Mail feeder and the WJDWP, you just place the mail in the feeder and press "GO".

Ensure accuracy and speed by interfacing with Hasler's full line of scales and weighing platforms.

Feed and seal envelopes automatically with instant thickness adjustment.

Replenish postage funds directly and immediately with a quick download, via Hasler's Telemeter Setting® (TMS) service.

Secure your system's funds with 4-digit PIN password protection.

Eliminate the need to manually feed individual tapes.

With the Automatic Tape Dispenser, you have the ability to program up to 99 labels at the touch of a single button.

Guarantee a clear, crisp, no mess imprint every time thanks to HP inkjet technology.

Meet government standards for digital meters with USPS IBI compliant indicia.

Hasler offers a better choice in mailing systems and a complete line of easily integrated options to enhance productivity in your mail center.
